GENERAL CONFERENCE INFORMATION

SCOPE OF THE CONFERENCE

The 14th Joint MMM-Intermag Conference (2019 Joint) is sponsored jointly by AIP Publishing and the IEEE Magnetics Society, in cooperation with the American Physical Society. Members of the international scientific and engineering communities interested in recent developments in fundamental and applied magnetism are invited to attend and contribute to the technical sessions. The technical program will include invited and contributed papers in oral and poster sessions, invited symposia, a plenary session, and an evening session, with about 1500 presentations overall. This Conference provides an outstanding opportunity for worldwide participants to meet their colleagues and collaborators and discuss developments in all areas of magnetism research.

SESSION CHAIRS

Poster and Oral Session Chairs should attend the Session Chair Breakfast at 7:15 am in Washington 4 (Exhibit Level) **on the day of their session**. Timer slides will be pre-loaded on the session laptops in each oral session room, however, Session Chairs should bring their laptop to be used as a backup for presentations if needed.

SPEAKER REHEARSAL ROOM

Presenters are encouraged to use the Speaker Rehearsal Room in Room 8222 to practice their presentations with the provided audio-visual equipment (LCD projector and screen). This room is available from Monday at 1:00 pm until Friday at 1:00 pm.

PUBLICATIONS

Peer-reviewed Conference papers will be published online in late 2019 as special issues of *AIP Advances* and the *IEEE Transactions on Magnetics* (TMAG). Entire sessions will be assigned to one of these journals by the Publication Co-Chairs. Invited papers will be published in the Journal to which their session is assigned. All accepted papers are identified by presentation ID. All *AIP Advances* papers will be open access at no additional cost to the authors.

To check the status of their papers, authors should refer to the AIP submission site at <http://mmm.peerx-press.org> or the IEEE submission site at <https://mc.manuscriptcentral.com/transmag-ieee>. For all other publication questions, visit the Conference Office in Room 8226.

ORAL SESSIONS

Nine simultaneous oral sessions will be held daily from 8:30 - 11:30 am and 1:30 - 4:30 pm. The Wednesday afternoon sessions will be held from 1:30 - 3:18 pm to accommodate the Plenary Session.

Speakers must bring their presentation on their own laptop computer. If you are unable to bring a laptop for any reason, presenters should alert their Session Chair and arrange to share their presentation by email.

In each session room there will be a multi-port switchbox so that speakers can connect their laptop during the question period of the previous speaker. Each speaker will be responsible for promptly connecting to the projector and switching to the correct input port. **The presentation timer will begin immediately after the introduction by the Session Chair. No extra time will be given in the event of technical difficulties as session timing must be strictly maintained to allow attendees to attend talks in multiple parallel symposia.** Speakers are strongly encouraged to test their laptop connections and screen resolution settings in the Speaker Rehearsal Room prior to the start of the session.

There will be a dedicated audio-visual technician in each oral session room to assist presenters as needed.

BEST STUDENT PRESENTATION AWARD

The Best Student Presentation competition, sponsored by the IEEE Magnetics Society, recognizes and encourages excellence in graduate studies in the field of magnetism. There will be a \$1000 one-year fellowship for the winner and \$250 one-year fellowship for the remaining finalists, who will be announced at the Presentation of Awards during the Plenary Session on Wednesday afternoon. Conference attendees are encouraged to attend the finalists' talks and support these young scientists.

AIMS AND SCOPE:

The *Journal of Magnetism and Magnetic Materials* provides an important forum for the disclosure and discussion of original contributions covering the whole spectrum of topics, from basic **magnetism** to the technology and applications of **magnetic materials** and **magnetic recording**. The journal encourages greater interaction between the basic

and applied subdisciplines of magnetism with short but comprehensive review articles, a rapid publication channel with "Letters to the Editor", in addition to full-length contributions. The section on *Information Storage: Basic and Applied* contains articles on all topics in magnetic recording media and processes.
